VESIcare tablets are indicated for the treatment of overactive bladder with symptoms of urine urgency, frequency, and urinary incontinence.

Important Safety Information

VESIcare tablets are indicated for the treatment of overactive bladder with symptoms of urine urgency, frequency, and urinary incontinence. The recommended dose of VESIcare is 5 mg once daily. If the 5-mg dose is well tolerated, the dose may be increased to 10 mg once daily.

As with other anticholinergic agents, VESIcare is contraindicated in patients with urinary retention, gastric retention, uncontrolled narrow-angle glaucoma, and in patients with hypersensitivity to the product.

In placebo-controlled studies, the most common adverse events reported by patients were dry mouth (10.9%, 27.6%, 4.2%), constipation (5.4%, 13.4%, 2%), blurred vision (3.8%, 4.8%, 1.8%), and dyspepsia (1.4%, 3.9%, 1%) with VESIcare 5 mg, 10 mg, and placebo, respectively.

Please see brief summary of Prescribing Information for the following page.

For more information, visit www.VESIcare.com.
Dear Colleagues and Friends

It is my honor to welcome you to the 60th Annual Meeting of the Northeastern Section of the American Urological Association (NS-AUA). This is a special meeting marking 60 years of scientific progress of the Urologists of Two Nations and the meeting this year further advances the progress that has been made over those years. However, the NS-AUA is more than a scientific society as we meet and enjoy the company of old friends and new acquaintances. At my very first meeting of the section in 1979, as a junior resident, Andrew Bruce, the department head at Queen’s at the time, remarked to me as we were entering the first session that I was now joining the best club in the world. How right he was!

This year’s meeting at Tamaya offers the best of a long tradition of excellent NS-AUA meetings. We are meeting in a spectacular setting with superb facilities for the presentation and discussion of great urological science. Rob Siemens has organized the sessions with lots of plenary sessions featuring superb guest speakers addressing a number of important issues in current urological practice. The submitted abstracts are being presented primarily at moderated poster sessions which will permit fruitful interaction between presenters and attendees.

Darren Beiko has organized a fun-filled social program highlighting the indigenous culture of the Santa Ana pueblo, on which the hotel stands, as well as the great American Southwest traditions of Route 66. Day trips for accompanying persons will keep our partners entertained and busy while we are in the scientific sessions. As the scientific program is shortened on Friday and Saturday, there will be opportunity to take advantage of the broad range of outdoor activities possible in this rural setting on the banks of the Rio Grande River. Hiking trails, a superb golf course, tennis courts and horseback trail riding are all available as well as some unique swimming pools and public areas for those who are interested in just relaxing in this beautiful setting. The evenings will be occupied with social programs, including Friday’s Fun Night featuring the history of Route 66 – that famous American thoroughfare which has its own rich history throughout the region.

We hope you enjoy the casual and relaxed atmosphere of this resort. This meeting is informal so tuxedos are not required for the final banquet on Saturday, which will close the meeting with a great send-off for our meeting next year in Montreal!

If there are any problems, concerns or suggestions, please do not hesitate to speak with me or any of the members of the organizing committees or the staff at the registration desk.

James W.L. Wilson
President, Northeastern Section of the AUA

Accreditation
The American Urological Association (AUA) is accredited by the Accreditation Council for Continuing Medical Education (ACCMCE) to provide continuing medical education for physicians. The AUA takes responsibility for the content, quality and scientific integrity of this CME activity.

Credit Designation
The AUA designates this educational activity for a maximum of 13.5 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

AUA Disclosure Policy
As a provider accredited by the ACCME, the AUA must ensure balance, independence, objectivity and scientific rigor in all its activities.

All faculty participating in an educational activity provided by the AUA are required to disclose to the audience any relevant financial relationships with any commercial interest to the provider. The intent of this disclosure is not to prevent faculty with relevant financial relationships from serving as faculty, but rather to provide members of the audience with information on which they can make their own judgments. The AUA must resolve any conflicts of interest prior to the commencement of the educational activity. It remains for the audience to determine if the faculty’s relationships may influence the educational content with regard to exposition or conclusion. When unlabeled or unapproved uses of drugs or devices are discussed, these are also indicated.

Unlabeled or Unapproved Use of Drugs or Devices
It is the policy of the AUA to require the disclosure of all references to unlabeled or unapproved uses of drugs or devices prior to the presentation of educational content. The audience is advised that this continuing medical education activity may contain reference(s) to unlabeled or unapproved uses of drugs or devices. Please consult the prescribing information for full disclosure of approved uses.

Disclaimer
The opinions and recommendations expressed by faculty, authors and other experts whose input is included in this program are their own and do not necessarily represent the viewpoint of the AUA or the NS-AUA.

Evidence-based Content
As a provider of continuing medical education accredited by the ACCME, it is the policy of the AUA to review and certify that the content contained in this CME activity is valid, fair, balanced, scientifically rigorous and free of commercial bias.

Special Assistance
As an organization accredited for continuing medical education (CME), the American Urological Association (AUA) fully complies with the legal requirements of the Americans with Disabilities Act rules and regulations. If any participant is in need of special assistance or has any dietary restrictions, a written request should be submitted at least one month in advance. For additional assistance with your request please call 410-689-4030.

The purpose of the Northeastern Section of the American Urological Association (NS-AUA) Foundation is to operate exclusively for educational, scientific and charitable purposes, including, but not by way of limitation, to foster, support and conduct education (including education of the general public) and research in the field of urology. The NS-AUA started funding research in 1995 through a grant from Searle Canada and Searle USA. The Research and Education Fund was established to assure the membership of the NS-AUA continuing excellence in research and educational activity within the Section. The NS-AUA Scholarship Program was established in 1998 to provide financial scholarships to support research and educational projects. The Section aims to offer two scholarship awards annually. These Young Investigator Awards provide financial assistance to a researcher in basic or clinical sciences related to urology, and to acquiring, developing or improving his or her knowledge and skills in a specific aspect of the specialty. In all, 18 researchers have been awarded research scholarships.

Through the generosity of our Section members and corporate supporters, the Research and Education Fund continues to grow. We gratefully acknowledge and thank:

- GTx, Inc.
- Pfizer Inc.
- sanofi-aventis Canada
- Vivos, Inc.
Dr. George E. Slotkin

Excerpt from The American Urological Association Centennial History 1902 – 2002: "No history of the Northeastern Section is complete without a short biography of this indefatigable urologist. Dr. George E. Slotkin (1890–1971) was born in New York City but soon moved with his parents to Buffalo, NY, where he spent his professional career. We acknowledge him today as a founder, the first benefactor and the first historian of the NS-AUA, but there is more to his story. If one were to hold up a mirror to the changing face of urology in the first half of the 20th century, it would be well reflected with an image of George E. Slotkin. A graduate of the University of Buffalo Medical School, Dr. Slotkin did postgraduate work at the New York City Post Graduate Hospital, the University of Vienna and the University of Budapest. In 1918, he became a clinical professor of urology at the University of Buffalo. During the late 1940s, his clinical interest was tuberculosis of the urinary tract, which he treated with chalazogoric acid. Even though results of his work in this area remain inconclusive, other fruits of his career do not. Friends and colleagues of his time were fond of saying, ‘George Slotkin has three loves: urology, his wife Helene and his colleagues of his time’.

Dr. Slotkin was named Clinical Professor of Urology Emeritus in 1954 by the University of Buffalo Medical School and continued his private practice until 1964. After retirement, he continued to write, contributing a fascinating chapter about the history of the Northeastern Section to History of Urology. It is a priceless, logical record of carefully researched facts.

His obituary notice implies that he may have been the first American invited to join the Canadian Urological Association. Dr. and Mrs. Slotkin did not have any children; his estate included a generous bequest to the Northeastern Section to provide funding for invited guest speakers at our annual meetings.

1998 Joyce L. Tenover, MD, Atlanta, Georgia
1999 Richard D. Williams, MD, Iowa City, Iowa
2000 Gerry S. Blavas, MD, New York, New York
2001 Alvaro Morales, MD, Kingston, Ontario
2002 Edson Pontes, MD, Detroit, Michigan
2003 Gerald L. Androche, MD, St. Louis, Missouri
2004 Michael A. Klein, MD, Philadelphia, Pennsylvania
2005 Margaret Sue Pearle, MD, Dallas, Texas
2006 Mani Menon, MD, Detroit, Michigan
2007 Darius Jehan Bagli, MD, Toronto, Ontario
2008 S. Larry Goldenberg, MD, Vancouver, British Columbia

2008 Invited Guest Speakers

Dr. David A. Bloom, MD
Chair, Department of Urology
University of Michigan
Ann Arbor, MI

Dr. Bloom is currently chair of the Department of Urology and served as chief of pediatric urology in the Department of Surgery from 1984-2001.

In 1984, Dr. Bloom joined the University of Michigan (UM) faculty as assistant professor of surgery and chief of pediatric urology. In 1986, he was promoted to associate professor of surgery and achieved his present rank of professor of surgery in 1993. In 2001, he became professor of urology when the Section of Urology in the Department of Surgery became the Department of Urology. In 2002, he received the Jack Lapidès Endowed Professorship in urology. Dr. Bloom served as associate dean for faculty from 2000-2007. In March 2007 he became chair of the UM Department of Urology.

Dr. Bloom’s clinical and scholarly interests include genitourinary reconstruction, lower urinary tract dysfunction, genital anomalies, neurogenic bladder, laparoscopy and medical history. During his time at UM, he has published more than 150 papers and 60 book chapters, and has served on the editorial boards of the Journal of Pediatric Urology, British Journal of Urology, Urology, Contemporary Urology and the Journal of Endourology. Dr. Bloom has also been a consultant for Stedman’s Medical Dictionary since 1992.

Dr. Bloom earned his medical degree from the State University of New York at Buffalo in 1971. After serving an internship in surgery at University of California–Los Angeles (UCLA), he completed residencies in general surgery and urology, both at UCLA, in addition to a fellowship in pediatric urology at the Institute of Urology of the University of London. In 1980, Dr. Bloom was appointed assistant professor of surgery at the Uniformed Services University of Health Sciences, and staff urologist at the Walter Reed Army Medical Center in Washington, DC. He was promoted to associate professor of surgery and named chief of pediatric urology at Walter Reed in 1983.

Dr. Bloom has memberships and held offices in 26 professional societies, including chair of the American Academy of Pediatrics, Section on Urology, historian for the Society for Pediatric Urology, and secretary-treasurer for the American Association of Genitourinary Surgeons. He is also a trustee of the American Board of Urology and a member of the Board of Directors of the American Board of Medical Specialties.
Dr. Guru is a member of the Endourological Association, American Urological Association, American Medical Association, and Jammu and Kashmir Urological Society. He has authored and co-authored several journal articles, abstracts and book chapters.

Dr. Lee is a urologist practicing in Calgary, Alberta at the Rockyview General Hospital. He completed his urology residency at Queen’s University, Kingston, Ontario. Dr. Lee then moved to the University of Washington in Seattle where his research focus was on urinary incontinence, prostate cancer and related topics. After a fellowship at the University of Utah, Dr. Lee took a position at the University of Toronto, where he is currently a professor and head of the Department of Urology. He has been a visiting professor at several institutions around the world, including the University of Toronto, the University of British Columbia, and the University of California, San Francisco. He is currently an editorial board member for several urology journals and has received numerous awards for his research in urology.

Judd W. Moul, M.D., FACS
Professor and Chief, Division of Urologic Surgery
Director, Duke Prostate Center
Duke University Medical Center
Durham, NC

Dr. Moul, a world-renowned authority on prostate cancer, is professor and chief of the Division of Urologic Surgery and director of the Duke Prostate Center at Duke University Medical Center. Prior to joining Duke, he was professor of surgery at the Uniformed Services University of the Health Sciences (USUHS) in Bethesda, MD and an attending urologic oncologist at the Walter Reed Army Medical Center (WRAMC) in Washington, DC. In addition, he was director of the Center for Prostate Disease Research (CPDR), a Congress-mandated research program of the Department of Defense based at USUHS and WRAMC. In 2004, he completed a 26-year U.S. Army career, retiring as a full colonel in the Medical Corps. Dr. Moul completed his urologic oncology fellowship at Duke University and graduated summa cum laude from Pennsylvania State University. He earned his medical degree from Jefferson Medical College, where he was elected to Phi Beta Kappa and Alpha Omega Alpha.

Dr. Moul currently serves on the editorial boards of Urology, Journal of Urology® and World Journal of Urology, and is Co-editor of Prostate Cancer and Prostatic Diseases. He has published more than 350 medical and scientific manuscripts and book chapters and has lectured at national and international meetings. He has been a visiting professor and invited guest lecturer at universities and national symposia, and has appeared on ABC, CNN, PBS and other media as a prostate cancer authority. Honors received have included the 1995 American Medical Association Young Physicians Section Community Service Award for his national involvement in prostate cancer patient support groups, the 1996 Sir Henry Welcome Research Medal and Prize from the Association of Military Surgeons of the United States and selection as a 1994 fellow for the American Urological Association/European Association of Urology International Academic Exchange Program. In 1997, Dr. Moul was the recipient of the prestigious Gold Cystoscope Award by the American Urological Association. He received the Baron Dominique Jean Larrey Military Surgeon Award for Excellence in 1998 and in 2004 was awarded the Order of Military Medical Merit from the Surgeon General of the US Army. In 2006, Dr. Moul was selected as chairman of the newly founded American Urological Association Foundation Education Council.
E-mail: josephine.sciortino@cua.org  
Web: http://www.cua.org/journals_e.asp

Dr. Soloway reintroduced and popularized the use of the periprostatic nerve block to reduce pain associated with prostate biopsies. He collaborated on many of the seminal clinical studies evaluating the use of LH-RH antagonists to treat advanced prostate cancer. Dr. Soloway was involved in the earliest development of the flexible cystoscope. Working closely with his partner G. Ciancio, Dr. Soloway incorporated liver implantation of tumor cells can occur on the altered urothelial surface, providing the treatment rationale for post-resection intravesical chemotherapy. In 2003, Dr. Soloway was chosen as the chair of the International Consultation on Bladder Tumors (SIU/WHO), responsible for defining the guidelines for the treatment of bladder cancer.

Eric Winquist, MD, MSc, FRCPC, FACP
Associate Professor, Department of Oncology
University of Western Ontario Medical Director
Clinical Cancer Research Program
London Health Sciences Centre
London, ON, Canada

Dr. Winquist is a consultant medical oncologist at the London Health Sciences Centre in London, Ontario, and an associate professor in the Department of Oncology, Division of Medical Oncology with cross-appointment in the Department of Otolaryngology in the Schulich School of Medicine & Dentistry at the University of Western Ontario. He is the medical director of the Cancer Clinical Research Unit and subcontractor for the Princess Margaret Hospital Phase II Consortium at the London site. He sits on executive committees of the National Cancer Institute of Canada Clinical Trials Group and the Cancer Care Ontario Practice Guideline Initiative, and is a member in — and contributor to — both the Gerontological and Head & Neck Disease Site Group. Dr. Winquist has been a principal investigator or co-investigator on numerous phase I, II and III trials in gerontological and head and neck cancer studies. Research interests include new anti-cancer drug development, biomarkers and health services research. He lives in London with his wife and three children.

The Board of Directors of the NS-AUA is pleased to announce that all accepted abstracts of the 2008 Annual Meeting have been published in the August issue of the Canadian Urological Association Journal (CUAJ) with generous support from Olympus Canada. A copy of this issue of CUAJ will be distributed with this program book.

On behalf of the authors, the executive officers extend their sincerest thanks and appreciation to the CUAJ, which is owned and officially endorsed by the Canadian Urological Association. CUAJ is a bi-monthly publication and is searchable on PubMed, with full-text articles on PubMed Central. Journal editors welcome your manuscripts for review and consideration for publication. For additional information on submitting manuscripts or subscription information, contact:

Josephine Sciortino, Managing Editor, CUAJ

---

Learning Objectives: Previous section meeting attendee surveys have pointed out an ongoing need to understand and review the rapidly expanding use of minimally invasive surgical techniques, including laparoscopy and robotics. These new technologies offer the potential promise of less morbidity operative courses with lessened recovery times. At the 2008 Section meeting, a moderated poster session will be devoted to advances in laparoscopy in urology and a case-based video educational event is planned to highlight technical problems and solutions for the urologist.

Prostate cancer remains one of the most common cancers in men. Active urologist members of the American Urological Association (AUA) continue to report prostate cancer as the number one area of interest. Our knowledge of this disease is growing rapidly, including improved understanding of the initiating factors, the usefulness of screening, ways to determine those cancers that pose a significant threat to the patient, and ways to potentially prevent the development of clinical prostate cancer and advanced stages of the disease. One of the 2008 moderated poster sessions as well as plenary sessions will allow in-depth discussion of management of both localized and systemic cancer as well as the role of guidelines in the treatment of this onerous disease. Specific questions to be addressed include disease prevention, the role of evolving technologies in the management of localized disease, the timing and organization of hormonal therapy protocols and the utility of cytotoxic regimens for hormone refractory disease. The management of benign prostatic hyperplasia (BPH) continues to be an important part of practice for the members of the NS-AUA. Plenary sessions, as well as moderated poster sessions, will address ongoing advances in the medical and surgical treatment of men with voiding difficulties related to BPH.

The success of novel targeted molecular therapies for metastatic renal cell carcinoma have significantly changed our management of this disease and a state-of-the-art lecture as well as moderated poster sessions at the 2008 meeting will facilitate the discussion of the use of these agents in our practice.

The management of male subfertility continues to be a complex and challenging field, and at this year’s meeting, a state-of-the-art lecture as well as a moderated poster session are planned to discuss advances in this sub-specialty field. This meeting will also feature additional poster sessions and state-of-the-art lectures on topics including erectile dysfunction, pediatrics and female urology. Overall, the state-of-the-art lectures, podium and poster sessions presented by many of AUA’s experts promise to deliver excellent educational value in the expanding world of urology.

Specific Learning Objectives: At the conclusion of the 2008 Annual Section Meeting, participants should be able to:

- describe recent developments in the medical and surgical management of urology patients
- identify new technologies for the treatment of urologic problems
- outline the challenges, advantages and pitfalls in the use of guidelines and nomograms in urologic practice
- recognize clinical presentation and treatment options for a variety of urologic abnormalities including pediatric problems
- list the various minimally invasive treatments for urologic diseases and their risk/benefits
- review basic laparoscopic and robotic techniques, applications and results in adult and pediatric patients
- evaluate recent data pertaining to various pharmacologic and surgical treatments for voiding dysfunction and urinary incontinence
- recognize the latest diagnostic/treatment options for various renal anomalies
- construct current management options for patients with urinary stone disease
- review new applications and modified treatments for patients with erectile dysfunction
- recognize genitourinary (GU) malignancies
- evaluate results of various laparoscopic and robotic approaches and techniques for benign and malignant urologic diseases
- assess research results and clinical series on management of prostate cancer and early diagnosis/screening in various patient populations
- review common pediatric urologic diseases and treatment updates
- review prognostic significance and treatments of various stages and grades of bladder cancer

Tours
THURSDAY, SEPTEMBER 18, 2008
12:30 – 3:30 p.m.
Tour Option: SANTA FE TOUR
Travel north to historic and picturesque Santa Fe.
Upon arrival you may take an optional guided walking tour, visiting such points of interest as the historic Plaza, St. Francis Cathedral, the Loretto Chapel with its famous “miraculous” staircase and the San Miguel Mission. Founded in 1610, Santa Fe was the last stop on the Camino Real, the Royal road that stretched from Mexico City to the northern reaches of the Spanish empire. Today it is the heart and soul of the Southwest and “Santa Fe Style” is synonymous with all the best the region has to offer. Its historic Plaza, winding streets, covered arcades, hidden gardens and courtyards and Pueblo-style architecture reflect the blending of Indian, Hispanic and Anglo cultures.
Enjoy a hosted lunch at Las Casas Sena in Santa Fe. Situated in the historic house built by Major Jose Sena in the 1860s, La Casa Sena features an internationally acclaimed menu drawn in the historic Plaza, St. Francis Cathedral, the Loretto Chapel with its famous “miraculous” staircase and the San Miguel Mission.
Enjoy a hosted lunch at Las Casas Sena in Santa Fe. Situated in the historic house built by Major Jose Sena in the 1860s, La Casa Sena features an internationally acclaimed menu drawn in the historic house built by Major Jose Sena in the 1860s.

Note: if minimum numbers are not met, tours will be canceled.

The following tours have been reserved for guests on Thursday, September 18 and Saturday, September 20, 2008. Each group will meet in the lobby of the Hyatt Tamaya prior to departure. On-site tour registration will take place at the hotel on Thursday, September 18 between 7:00 a.m. and 5:00 p.m. and will be on a first come, first served basis for any open spots. Payments can be made on site at the hotel for any tours which have not been pre-registered or pre-paid.

Tour Option: SANDBIA PEAK TRAM AND SANDBIA CREST Hike
Head east to the foothills of the Sandia Mountains for a ride on the Sandia Peak Tram, the world’s longest free-span cable tramway, and a hike along part of the Sandia Crest Trail. The 2.7-mile tramway ride to the top will take you through the seven life zones found in North America. Travelling through the seven life zones is equivalent to taking a trip from Mexico City to Alaska and is not for the faint of heart or those concerned with heights! Once atop Sandia Peak, at an elevation of 10,375 feet above sea level, you will marvel at the thousands of square miles of breathtaking scenery and panoramic views in all directions.
There is an extensive system of maintained trails in the Sandia Mountain Wilderness Area. The Crest Trail runs for 28 miles from Tijeras Canyon in the south to the village of Placitas at the north end of the Sandias. Your optional hike will take you along a section of the trail with breathtaking overlooks. This is an easy hike. Wear sturdy shoes and a hat. Hike is not recommended for guests with heart or breathing ailments.
Cost: $80
Includes transportation, professional tour guide, interpretive guide, round trip passage on the Sandia Peak Tram, bottled water, driver gratuities and all applicable taxes.
Panoramic vistas of the Sandia Mountains and the sacred butte known as Tuyuna, or “Snakehead,” are impressive. Framed by the immaculate fairways and greens. The tours and vegetation of the high desert landscape highlight the natural wonders, including tennis balls, hand towels and water.

Cost: $30
Includes: Tennis balls, hand towels and water.

Golf Tournament
SATURDAY, SEPTEMBER 20, 2008
12:30 – 3:30 p.m.
TWIN WARRIORS GOLF COURSE
Carefully sculpted into the natural terrain among 20 ancient cultural sites, Twin Warriors Golf Club offers 18 championship holes of New Mexico’s most picturesque golf. The course is a signature design by noted architect Gary Panks, and highlights the natural wonders, contours and vegetation of the high desert landscape framed by the immaculate fairways and greens. The panoramic vistas of the Sandia Mountains and the sacred butte known as Tuyuna, or “Snakehead,” are impressive. Errant shots are not rewarded on this beautiful environment. Mentally sensitive spread. The practice facilities include a driving range, short game practice areas, practice putting greens, private teaching area and learning center. Private and group instructional sessions are available with PGA and LPGA professional staff. Club storage for resort guests and club repair are also available at the Pro Shop. To enhance your round and save you strokes, each of the 72 Club Car™ electric golf carts are equipped with ParViewGlobal Positioning System (GPS) that locates you on the course and provides very precise yardage. Guests are invited to bring their own golf clubs or to rent from the Golf Course (please indicate if you require right- or left-handed clubs). Guests can pre-register for this event when they register for the conference or they can register on site upon arrival at the hotel. Please pick up your information packages for the golf tournament from the registration desk when you arrive for the conference.

Note: For those guests who are bringing their golf clubs, your clubs will be transported to the golf course prior to the tournament. As such, all golf clubs must be tagged with your name when they are dropped off the morning of the event. Tags will be provided for those who do not have name tags for their golf bags.

Cost: $150
Includes greens fees, cart, range balls, bag transfers and set-up fees.

5k Run/Walk
Supporting education and research grants for residents
FRIDAY, SEPTEMBER 19, 2008
6:30 – 8:00 a.m.

All runners and walkers, come and run or walk! Or, if you prefer, be a sleepwalker—stay in bed and contribute $15 to the Section’s Foundation in support of educational grants for residents.

Come and join your colleagues on an early morning run along the Bosque Fitness Trail located just east of the resort. The Bosque Trail stretches from north to the south in between the resort and the Rio Grande River. The start of the race will be just outside the resort. You can pre-register for this event when you pre-register for the conference or you can register on site. Prizes will be given to the top two male and female runners and the top two walkers. Race begins at 7:00 a.m.

Cost: $15 (all proceeds go toward the Section’s Foundation in support of educational grants for residents)
Includes: T-Shirt, water bottle, Gatorade, fresh fruit, yogurt and granola bar.

Tennis Tournament
SATURDAY, SEPTEMBER 20, 2008
12:30 – 3:30 p.m.
HYATT REGENCY TAMAYA
Enjoy our tennis tournament on one of the Hyatt Regency Tamaya’s outdoor tennis courts, while you enjoy the fresh New Mexico air.

You can pre-register for this event when you register for the conference or you can register on site when you arrive.

Cost: $30
Includes tennis balls, hand towels and water.

Get your kicks on Route 66! New Mexico is the site of a significant stretch of Route 66, America’s most celebrated highway, which carried the people and energy that shaped the modern Southwest. The Mother Road is still alive today in the fascinating blend of roadside architecture that mixed tourist services with locally oriented businesses stretching over 20 miles through Albuquerque. This evening’s event will recapture the magic of this legendary and celebrated road. Travel tonight in one of five vintage automobiles from the hotel’s Carriage Circle to the event.

Begin your journey on the Mother Road in Chicago, then motor on south to St. Louis’s big Mississippi River and Arch. Oklahoma is your next pit stop with its rolling hills and windmill. The Land of Enchantment, New Mexico, offers beautiful pueblo life scenes. Then it is on to your final destination of the Santa Monica Pier. The soda fountain makes a nice watering hole to finish off the evening. Interactive video games will surely bring out the competitive side in you!

Note: If you have registered for the NS-AUA 2008 Annual Meeting, you will receive one complimentary ticket. Additional tickets are $100 and can be purchased at the Registration Desk.

Tonight’s theme will take you along Route 66, from a Chicago skyline to a Pacific Ocean sunset. The main sites around the room will be the streets and the stars above. From the clubs and neon signs of the cities to the quaint streetlights of small town America, you will be taken back to a time where elegance was expected at an event and fun was had by all. The room is a time warp from the cities to the countryside of the 50s and 60s.

If you have registered for the NS-AUA 2008 Annual Meeting, you will receive one complimentary ticket. Additional tickets are $100 and can be purchased at the Registration Desk.
Quick Guide to Tamaya

Meeting Location

**Climate**
Situated west of the Sandia Mountains, the climate at Hyatt Regency Tamaya Resort & Spa is not what many expect for a Southwest Resort. At an altitude of 5,050 feet, there is low relative humidity and more than 300 days of sunshine per year. The average high temperature in September is 82°F (28°C). Average low temperature is 55°F (13°C).

Tourist Information: [www.itsatrip.org](http://www.itsatrip.org)

**Airport**
The Albuquerque International Sunport is a world-renowned, full-service facility that welcomes more than six million travelers per year. As the state’s largest commercial airport, the Sunport serves as the gateway to the diverse cultures, rich history and breathtaking landscapes that are New Mexico. They are committed to providing a clean, safe and passenger-friendly facility that is capable of meeting the current and future travel needs of visitors and New Mexicans alike. The Albuquerque International Sunport is owned by the City of Albuquerque and operated by the Aviation Department. For more information, visit [www.cabq.gov/airport](http://www.cabq.gov/airport).

New MexiTours Transportation:
Service is offered to and from the Albuquerque airport and the hotel, via vans or sedans by calling 505-771-6060 or 505-771-3739.

Cost: $40 for the first person, $10 each additional person within the same party. Please contact the Concierge for private sedan pricing.

Hours: 6:00 a.m. to 6:00 p.m., with pick up every hour on the hour. Private sedans are also available after 6:00 p.m. upon request.

Reservations: Are required. Please contact the hotel concierge at least 24 hours before arrival at the airport or departure from the hotel for arrangements.

Cancellations: Minimum two hours notice is required to avoid a cancellation fee.

For guests arriving or departing from Santa Fe airport, please contact the hotel concierge for transportation information and reservations.

**Rental Cars**
There are several car rental companies located in the Albuquerque International Sunport Airport. However, Avis is offering special discounted rates to all meeting attendees. Reservations can be made by calling:

1-800-331-1600
Hearing Impaired/TDD: 800-331-2323
Spanish Translation: 800-874-3556

Reference the AUA Discount code: J907607

---

Keynote speaker Ron Grimes presents, “Patrick Floyd Garrett: From Buffalo Hunter to Man Hunter.” Pat Garrett is remembered best as the sheriff who shot the Southwest’s most infamous outlaw, Billy the Kid. Garrett, however, left other indelible marks on the pages of New Mexico and West Texas history. In the period between that fateful night at Fort Sumner on July 14, 1881, when he ended the career of the Kid, to his mysterious death near Las Cruces, Garrett became one of New Mexico’s most colorful, enigmatic historical figures.

Speaker Ron Grimes has always been fascinated by the characters of the Old West. He has spent most of his life performing as a Chautauquan, at conventions, Western stage shows, schools, dude ranches and cowboy campfires throughout the Southwest.

Note: If you have registered for the NS-AUA’s 2008 Annual Meeting, you will receive one complimentary ticket (Residents receive 2 tickets). Additional tickets are $75 and can be purchased at the Registration Desk. Children under 21 are not permitted.

**Tamaya Mist Spa and Salon:** Tamaya Mist offers a well-equipped fitness center and a beautiful yoga/aeobics wellness theater. Separate men’s and women’s meditation, sauna/steam and changing areas add to the relaxed enjoyment of this world-class spa. Enjoy a local treatment such as the “Spirit Path,” or a specialized massage with your choice of scented oils from the Aromatherapy Bar.

**Twin Warriors Golf Club:** Twin Warriors Golf Club is 18 holes of desert, championship golf, routed in and around 20 ancient cultural sites of previous habitation and activity. Ranked 49th in the top 100 public courses in America by Golf Digest, the course has beautiful grassy knolls and ridges dotted with Juniper and Pinon Pine. Wonderful dry washes known as arroyos and eroded land features, along with the sacred butte known as Tuyuna or “Snakehead,” complete a picture framed by spectacular views of the Sandia Mountains. Greens fees at Twin Warriors are good for 24-hour unlimited play, every day.

**Stables at Tamaya:** Trail rides offer a unique and fun way to experience the Pueblo backcountry. Along your journey, you will enjoy spectacular views of the Sandia Mountain silhouette against the New Mexican sky. Your peaceful ride will take you through the cottonwood trees that line the Rio Grande and Jemez Rivers, as well as meander along trails where the Tamayame have traveled for centuries.

**Tamaya Cultural Activities:** Observe traditional Pueblo bread baking made fresh in the grand courtyard with our authentic Huruna. Sample the fresh loaves as they come out of the oven with your choice of butter, jam or honey. Different tribal members from the local pueblos host each baking. Discover their personal stories and family traditions. Flute playing and tribal dances are also featured weekly.

**Camp Hyatt:** The Camp Hyatt program is filled with fun experiences for kids, ages three to 12. While parents head off on their own adventures throughout the resort, kids can have fun at Camp Tamaya making traditional adobes, creating their own sand paintings, learning Native American games, exploring the Bosque, learning to weave and swimming with new friends.

If a sacred land can inspire an entire culture, imagine what it can do for a day of learning and adventure at Camp Hyatt? The earliest settlers of the Santa Ana Pueblo, where Camp Tamaya is found, created a rich cultural tradition unique to New Mexico and the Southwest. When your kids visit here, they’ll experience a centuries-old way of life and incredible opportunities to explore the culture and traditions of this special and amazing place.

**Additional Activities:**
- hot air balloononing
- tennis courts
- nature trail along the Rio Grande
- bicycle riding
- three outdoor heated pools
- two-story water slide
- Trading Post gift shop
- Galleria Tamaya
- casino featuring poker, blackjack, craps, roulette and slot machines
American Medical Systems

10700 Bren Road West
Minnetonka, MN 55343
Phone: 952-930-6000
Fax: 952-930-6373
www.AmericanMedicalSystems.com

American Medical Systems is a world leader in medical devices and procedures that treat three major diseases: incontinence, erectile dysfunction and benign prostatic hyperplasia (BPH). Any one of these conditions can profoundly diminish a patient’s quality of life and significantly impact relationships. Our products provide a cure or reduce the incapacitating effects of these diseases, often through minimally invasive surgery.

**Signature**
VESIcare®
(solifenacin succinate) Tablets

**OVERVIEW OF PRESCRIBING INFORMATION**

VESIcare is indicated for the treatment of overactive bladder with symptoms of frequency, urge incontinence, urgency and nocturia.

**INDICATIONS AND USAGE**

VESIcare is contraindicated in patients with urinary retention, gastric obstruction, prostatic hypertrophy, and detrusor muscle hypertrophy by reflex (e.g., spinal cord injury) or as an offshoot of the disease.

**CONTRAINDICATIONS**

- Patients with urinary retention
- Patients with gastric obstruction

**WARNINGS**

- Urinary retention
- Gastric obstruction

**PRECAUTIONS**

- Urinary retention
- Gastric obstruction

**ADVERSE REACTIONS**

- Urinary retention
- Gastric obstruction

**DOSE AND ADMINISTRATION**

- VESIcare should be administered with or without food.
- VESIcare can be administered with or without food.

**CLINICAL PHARMACOLOGY**

**Pharmacokinetics**

- **Absorption**
  - Solifenacin succinate is rapidly absorbed following oral administration.
  - Peak plasma concentrations occur within 1–2 hours.

- **Distribution**
  - Solifenacin succinate is extensively distributed to tissues, including the central nervous system.

- **Metabolism**
  - Solifenacin succinate is metabolized by CYP3A4.
  - The metabolites are excreted in urine and feces.

- **Elimination**
  - The terminal half-life of solifenacin succinate is approximately 13.4 hours.

**NURSING MOTHERS**

VESIcare should not be administered to breastfeeding women as it has been shown to appear in human milk.

**PREGNANCY**

- Solifenacin succinate had no effect on reproductive function, fertility or embryotoxicity or teratogenicity was observed in mice treated with oral doses of 100 mg/kg/day and greater (1.7 times exposure at the MRHD) or greater increased peripartum pup mortality.

**Labor and Delivery**

- Solifenacin succinate is not associated with maternal toxicity when administered to pregnant mice at doses of 100 mg/kg/day and greater (3.6 times exposure at the MRHD).

**OVERDOSE**

- Symptoms of overdose include urinary retention, gastric obstruction, and disorientation.

**INTERACTIONS**

- Solifenacin succinate should be administered with caution in patients being treated with other anticholinergic drugs.

**DOSAGE AND ADMINISTRATION**

- For patients with renal impairment, a daily dose of 5 mg may be recommended.
- For patients with hepatic impairment, a daily dose of 5 mg may be recommended.

**CLINICAL STUDIES**

**Efficacy**

- VESIcare was effective in reducing the frequency of urgency and urgency urinary incontinence in patients with overactive bladder.

**Safety**

- The most common adverse events reported in clinical studies included dry mouth, constipation, and urinary retention.

**ADVERSE EVENTS**

- The incidence of adverse events reported in clinical studies of VESIcare is summarized in the following table.

<table>
<thead>
<tr>
<th>Adverse Event</th>
<th>VESIcare 5 mg</th>
<th>VESIcare 10 mg</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nausea</td>
<td>2.0%</td>
<td>4.0%</td>
</tr>
<tr>
<td>Constipation</td>
<td>5.4%</td>
<td>13.4%</td>
</tr>
<tr>
<td>Abdominal Pain</td>
<td>1.0%</td>
<td>3.3%</td>
</tr>
<tr>
<td>Urinary Retention</td>
<td>4.2%</td>
<td>7.2%</td>
</tr>
<tr>
<td>Adverse Events</td>
<td>39.4%</td>
<td>44.6%</td>
</tr>
</tbody>
</table>

**LABORATORY TESTS**

- No significant changes in laboratory test results were observed in clinical studies.

**DRUG-DRUG INTERACTIONS**

- Solifenacin succinate is metabolized by CYP3A4.
- The metabolism of solifenacin succinate is affected by potent inhibitors of CYP3A4.

**REPRODUCTION STUDIES**

- In a study of the effect of solifenacin on the QT interval in 76 healthy volunteers, the QTc interval was not increased at therapeutic doses of solifenacin at 10 mg/day and 1.3 times exposure at the MRHD or greater compared to placebo.

**REIMBURSEMENT**

- VESIcare is covered by many major third-party payers.

**References**

- Information from the Clinical Study Sections of the Prescribing Information.

For a difference in dryness... 
choose VESIcare

Important Safety Information
VESIcare tablets are indicated for the treatment of overactive bladder with symptoms of urge urinary incontinence, urgency, and urinary frequency. The recommended dose of VESIcare is 5 mg once daily. If the 5-mg dose is well tolerated, the dose may be increased to 10 mg once daily.

As with other anticholinergic agents, VESIcare is contraindicated in patients with urinary retention, gastric retention, uncontrolled narrow-angle glaucoma, and in patients with hypersensitivity to the product.

In placebo-controlled studies, the most common adverse events reported by patients were dry mouth (10.9%, 27.6%, 4.2%), constipation (5.4%, 13.4%, 2.9%), blurred vision (3.8%, 4.8%, 1.8%), and dyspepsia (1.4%, 3.9%, 1.0%) with VESIcare 5 mg, 10 mg, and placebo, respectively.

Please see brief summary of Prescribing Information on the following page.
